Key Responsibilities

- Responsible for planning, designing the fieldwork, in consultation with your reporting officer and based on the objectives & deliverables of the project.
- Mobilization of farmers and members for Farmer Producer Organizations including awareness building.
- Strengthening of Farmers institutions – FIG at the village level and FPO/FPC at the block level.
- Undertaking required capacity building needs assessment and to provide the required support to the producer’s organizations.
- Conduct capacity building activities (Training, mentoring, exposure visits etc) of Farmer, BOD members, office bearers, staff and other members of the FPO from time to time.
- FPO study-collect data pertinent to present situation of farming by visiting the project area to understand the current state of target families
- Provide training in Sustainable Agriculture Practices with a minimum of 700 farmers per FPO.
- Conducting awareness sessions, Training and Meeting with Lead farmers and board members on sustainable and climate resilient agriculture practices.

- Training of trainers-Farmers trained to become Lead Farmer (LF).
- Organize Farmer Field School – demonstration methods for introduction and large-scale adoption.
- Identification of Micro/Green enterprises on organic inputs and value addition of farm produce within the FPO ecosystem
- Participating in the project review meetings, share progress, constraints and challenges faced with the team on a regular basis
- Any other project related activities like and when required and assigned by the management.
